---

Coding Projects

Cy Client | *C# .NET*   2020
- Built a media downloader for a cloud storage provider by scraping items in an album
- My most successful open source software with over 11,000 downloads

Air Quality Index CLI | *JavaScript, NodeJs Axios*   at the height of 2019 haze
- as the name suggest, it reads quality of your desired area.
- Had a hiring manager said this tool is useless but as someone who sits in front of computer for 12-hours and run everyday this tool helped me decide whether is it safe to run outside.
- Why? browsing the web page is inefficient when you doing it 10 times a day.

Bank Negara Malaysia Open API | *NodeJs, Axios*   2019
- Built a Javascipt wrapper for Bank Negara Malaysia Open API. Deployed on NPM

Final Year Project | *Android, Java*   Nov 2018 - Feb 2019
- Final year project at Universiti Tenaga Nasional
- Developed a consumer facing mobile application using Android native technology
- Develop and update project plans for information technology projects including information such as project objectives, technologies, systems, information specifications, and schedules.
- Monitor and track project milestones and deliverable.
